

CAPABILITY DESCRIPTION

Emerging in 2019, Bellinger Systems have continued the legacy of Bellinger Instruments after 52 years of service. Bellinger provides a diverse range of in-service support activities on Defence systems and equipment. Specialising in leading edge communications technologies, including LINK 11/16/22 and RF Distribution Systems. We provide support to Electronic, Electrical & Electro-mechanical items. We cover all levels of complexity and can repair down to component level which enables us to deliver a complete One-stop shop support solution. Our approach to every overhaul is to treat each one differently. We customise each job to provide the best and most comprehensive support, while optimising processes to meet client operational targets. We believe that our clients requirements are the focus of everything we do. We combine a "can do" attitude with diligence and technical excellence. Our Sydney based workshop is equipped with a large range of test equipment that enhances our staff's capability to exceed our client's expectations. So, whether you are looking for a short-term 'material and labour' service or a longer-term collaborative arrangement, Bellinger has a solution that meets your requirements.

SERVICES PROVIDED

- Preventive and Corrective maintenance on systems and component level items
- Repair and Overhaul on Electronic, Electrical & Electro-Mechanical equipment.
- Test equipment Calibration
- In-country design or build-to-print of electrical and electronic assemblies and equipment.
- System Integration, Installation and Commissioning
- Obsolescence Support
- Supply of Equipment, Materials and spare parts

DISCRIMINATORS

- Able to reduce ownership costs of a system by repairing items that would otherwise be replaced at a substantially higher cost delivering savings to our customers budgets.
- Support of equipment completed locally saving turn-around time and freight costs/risk on foreign equipment.
- Defence Industry Security Program (DISP) member. (Pending)
- Well established parts supplier network enabling us to locate hard to find items. Full traceability of components is assured.
- Proven track record of providing support to OEM and Obsolete items or products from companies that are no longer in business. Defence engage our services frequently.
- ITAR experienced with processes in place for ITAR Items and documentation.
- Well experienced in the processes for importing and exporting Defence items reducing delivery delays and customs holdup risk.

EXPERIENCE / EQUIPMENT SUPPORTED

- Electronic Equipment Design and Manufacture
- RF, Communications and Navigation Equipment
- IFF System Equipment
- Radar / Sonar systems
- Link 11/16/22
- Power supplies / Inverters / UPS's
- Switchboards / Power Distribution
- High Current Circuit Breakers
- Control / Monitoring Panels
- Landing, Search, Floodlight and General Lighting
- Electrical Motors / Pumps
- Engine Control and Monitoring Equipment
- Gauges / Meters / Sensors / Transducers
- Ground Support Equipment / Masts
- Test Equipment Repair / Calibration
- Circuit Card Assembly Repair
- Instrumentation
- General Electrical And Electronic Equipment

KEY CUSTOMERS

- Australian Defence Force
- Capability Acquisition and Sustainment Group (CASG)
- Boeing, Raytheon, Thales, BAE Systems, ASC, L-3 Communications, A&P, Leonardo, Leonardo DRS.

KEY PARTNERSHIPS

- Support agreements with RF Products Inc., Leonardo DRS, Specialty Systems, Seascope, Mitso Consulting.

QUALITY APPROVALS

- AS/NZS ISO 9001:2015

NO. EMPLOYEES - 15
